Trowel and Brush				
Type of feature:				
Stratigraphic Matrix				
This context is 21879 RECTANGLE OF DARK DEPOSIT				
Your interpretation:	internal	External	Structural	Other (specify) cooking? area in external courtyard(?)
Your discussion: THIS DEPOSIT IS BOUNDED ON ALL SIDES BY CRUSHED LIMESTONE. CURRENTLY, IT IS DIFFICULT TO DETERMINE ITS SIGNIFICANCE.				
UPDATED 4 III 08				
<p>VERY rectangular and linear. Has <u>areas</u> <u>sections</u> which are very dark and ashy. In the mid to north center of it there is a patch with pieces of limestone and ceramic sherds surrounded by dark sediment and ash. Distinctly functioned in association with burning given ash - cooking installation. Slightly west of north in orientation and not on direct axis of thick wall (21876) is on limestone rubble (21931), leveling rubble. It is very worn down so difficult to ascertain boundaries (upper)</p>
