<b>Your discussion:</b>															
<p>Cut for a ashy &amp; silty deposit (21879) that also was associated with cut 29310 &amp; fill 29309. 29310 is a cut of a possible hearth &amp; 29316 thus may be a room or space where rooking or burning took place. We sampled half of the deposit from cut 29316 for flotation to see what other relative information about it could be determined. A fragment of worked limestone was found &amp; bagged. It was a bowl piece.</p>															
Placement in square <span style="margin-left: 20px;">101.Y29</span>
