Your interpretation:	Internal	External	Structural	Other (specify)
Your discussion:				
<p>Sandy silt layer, probably the result of a mudbrick crushed deposit (?).</p> <p>Thin layer with at some part, small patches of limestone crushed visibles. It is probably the top of the layer [29276] (crushed limestone levelling deposit upper terrace) which is visible in a section in the burial [29450] which cut this layer (N/S).</p>
