Your interpretation:				
Internal	<input checked="" type="radio"/> External		Structural	Other (specify)
Your discussion:				
<p>This pit is most likely S. Hassan's sandstone deep in order to see how deep was the block located and how thick was the original wall rubble <del>29866</del>. It goes right down to the bed bottom (limestone) → this shows chisel marks, also seen in the <span style="float: right;">Placement in square</span> <del>section</del> side; this step in the bedrock which is at the bottom of [29867] could be made in order to get an easier access to the quarry.</p>
