graphic description

final locus no. _____ arch. unit/logical area _____ stage (in sq) _____ final STRATUM _____

OPENED [W9019] was opened when a series of 11 header stones was found emerging from the west baulk and extending in a southeasterly direction into the south west part of the square.

DEFINITION/LIMITS [W9019] extends from the west baulk 27cm north of the southwest corner and runs in a southeasterly direction for about 2 meters.

CLOSED [W9019] was ^{not} closed at the end of the 1986 excavation season. It remains in place.

RELATION TO OTHER ELEMENTS - [W9019] was covered by the soil of [L9000]. The kurkar surface [L9012] reached [W9019] at its top. The three adjoining flat stones were at approximately the same elevation as Floor [L9012] and may have served as a threshold. Floor [L9027] reached [W9019] immediately under the flat stones adjoining it. [W9019] began to float in [L9033].

CONSTRUCTION - [W9019] was constructed of 11 header stones (visible in square A.J.3.2). Only packed earth and rubble was visible under the west end of [W9019]. 4 ^{CUT} stones are lying under the east end of [W9019] and extending beyond the last header stone. ^{They seem to be part of the same wall.}

basket no.	level	str def	cont	R ±	periods	comments
						<p>Note:</p> <p>It appears that the 3 "threshold" stones running alongside the header blocks of [W9019] ^{orig. removed} during the excavation of [L9027]. Elevations taken on top of the 3 stones indicate a W-E slope of 16.04-15.96 (stone 1 to 3). Only the bottom elevation of the east-most stone was taken, 15.80. The photo of [L9027] shows these stones are missing when [9027] was being cleared. The card for [L9033] states that "the stones adjacent to [W9019] rested upon floor make up of [L9033]." I.E. the 3 stones were above (floated above?) [L9027]. When these stones were removed the fill should have been assigned a separate number.</p> <p>7/02 EB-S unlikely that Ph. 1B L9033 ran under ^W9019. This wall is built in Ph. 2 style comparable to AK 31. W9136 + AJ 33. W909.</p>
