final locus no. _____ arch. unit / logical area _____ stage (in sq.) _____ final STRATUM _____

Summary:

Description: OPENED: CAME DOWN ON MUDBRICK MATERIAL IN EASTERN PART OF L9118. L9118 AND L9116 THIS DIVIDED INTO L9135, L9134 AND L9133. DEFINITION/LIMITS: NORTHERN AND EASTERN LIMITS ARE BAULKS, TO THE EAST L9135 REACHES L9134, AND TO THE SOUTH L9135 IS CUT BY A ROBBER'S TRENCH L9115 AND ALSO L9135 REACHES L9132 WHERE THE PIT HAS SHRUNKEN BACK WESTWARDS. MATRIX: LIGHT BROWN CRUMBLY MATERIAL SIMILAR TO THAT FOUND IN L9133 THOUGH WITH LESS SHELLS AND POSSIBLY MORE POTTERY. REASON FOR CLOSING: CLOSED WHEN MUDBRICK MATERIAL OF L9134 REMOVED TO EXPOSE HEADER WALL L9147 BELOW.

RELATION TO OTHER ELEMENTS: L9135 LAY DIRECTLY BELOW THE WESTERN PART OF L9118 AND DIRECTLY ABOVE L9148. MATRIX FOR WEST PART OF L9118, L9135, AND L9148 BELOW, BASICALLY THE SAME.

L9135 REACHES THE MUDBRICK MATERIAL L9117, AND IS CUT BY A ROBBER'S TRENCH L9115 AT ITS SW END. L9135 REACHES PARTS OF THE NORTH EASTERN END OF L9132 SINCE THE ROBBER TRENCH L9115 SHRINKS. MATRIX OF L9135 SIMILAR TO THAT OF L9132 TO THE SOUTH, BUT L9132 STILL SEEMS TO BE OF HARDER, PACKED MATERIAL.
 7/02 EB-S cont into AK33 as L92AZ. Either podium fill or a later fill.
