Unit	Phase	Stage	Stratum	PoM
Summary				

Opened: To remove soil wash caused by erosion since 1989 season

- Limits (N) Bounded by material below loci [L9369] & [L9375]  
 (S) Bounded by N bank of Square A131  
 (E) Bounded by E bank of Square A132  
 (W) Bounded by [L9503] and material below ([L9530]), and by [L9508] and material below ([L9539])

Closed: Reached 1989 season elevations, and came down upon six distinctly different areas of material

Matrix: Crumbly, grey soil, with mudbrick debris throughout and cobbles (1st to head size) apparent in northern half of [L9600]; several larger stones clearly had fallen into square due to erosion

Relations: [L9600] is a "cleaning" locus, containing non-stratified wash caused by erosion since 1989; as such, [L9600] covers, but does not seal, [L9207] & [L9208] (1987 season), and [L9367] & [L9368] (1989 season)

Additional Observations/Value: [L9600] has no meaningful value for stratigraphic analysis

(61)

## Locus Basket List
