Summary

Opened: To continue excavating pit from 1987 season (L9207)

- Limits (N)** Bounded by W9626
(S) Bordered by L9623 & L9624
(E) Bounded by E bank of AI32
(W) Bounded by L9625

Closed: Came down on floor within pit; opened L9677 as continuation of pit & floor F9623

Matrix: Gray soil, mixed with lots of pottery, ash, charcoal, bits of plaster, glass, and bones

Relations: L9600 covers, but does not seal pit L9622. L9622 covers, but does not seal L9677. To the N, the material of L9622 reaches W9626. The part of F9623 that underlies L9622 reaches W9626*. Also to the N, the material of L9207 which lies above L9622 (1987 season) covers and reaches W9626 at the wall's E end. To the S, L9622 cuts fills L9623 & L9624, but floats above F9623 in L9622 since the pit narrows as it approaches its bottom. To the E, L9622 reaches the material in the 1989 E bank of AI32. In 1989, the E bank was cut back 5m without being excavated stratigraphically. Therefore, there are no loci that directly relate to L9622. To the W, L9622 cuts the fill of L9625 and the part of F9623 that underlies L9625.

* NB: The part of F9623 which lay under L9622 was excavated as a twilight zone (?d) to the pit L9677 below.

Additional Observations/Value: The penultimate locus in a series of loci constituting a single pit.
