Summary

Opened: Reached the probable end of the suspected robber trench [L9612] & [L9629]

Limits (N) Bounded by the N bank of A132
 (S) Bounded by [L9152]
 (E) Bounded by the E bank of A132
 (W) Bounded by material below [W9051]

Closed: Came down on floor [F9656]; opened [L9660], fill below floor

Matrix: Mud-brick debris material, a few bones, and very little pottery, apart from a fragmentary cup-and-saucer

Relations: [L9656] covers and seals [L9660]. [L9612] and [L9629] cover, but do not seal, [L9656]. To the W, [W9051] floats above [L9656]. To the N, [L9656] reaches the material at the bank line between A132 and A133, but, since A133 has not yet been excavated here we cannot yet determine their relation. To the S, material of [L9656] may be identical to that of [L9152]. [L9152] is described as a fill locus, closed because excavators thought "we might be coming down on a floor." To the E, [L9656] reaches the material in the E bank of A132. In 1989, the E bank of A132 was cut back 5 m because of heavy erosion, without being excavated stratigraphically. Therefore there are no loci that directly relate to [L9656].
 * [F9656] continues into the pedestal below [W9051].

Note: Photo #s supplied by photographer were incorrect, check negatives for 70360-? negatives of this locus.
 Additional Observations/Value: Important only in that it ends on a floor that seals material below.
