**Summary**

**Opened:** WHEN CLEANING W9278 REVEALED A SECOND WALL EXTENDING N/S FROM W9278 AND UNDER W9096.

**Limits (N)** BOUNDED BY W9278

**(S)** BOUNDED BY W9096

**(E)** BOUNDED BY L9773

**(W)** BOUNDED BY UNEXCAVATED UN-NUMBERED LOCUS.

**Closed:** NOT CLOSED, END OF SEASON

**Matrix:** 8-10 STONES AND COBBLES, RANGING FROM ~10cm TO 45cm IN DIAMETER, RUNNING NORTH TO SOUTH. IT IS 2 COURSES HIGH.

**Relations:** W9839 may be cut by W9096 AND IS BONDED WITH W9278 WHICH RUNS EAST TO WEST. TWO REMAINING STONES BELONGING TO W9286 FLOAT ON TOP OF THE HIGHEST COURSE OF W9839 AT ITS JUNCTION WITH W9096. L9773, BEING A ROBBER TRENCH, MAY HAVE ROBBED OUT A PORTION OF W9839 AND/OR W9278. THE UN-NUMBERED LOCUS TO THE WEST MAY BE A SECOND ROBBER TRENCH IF IT IS A CONTINUATION OF THE WALL AND LOCUS COMPLEX OF W9278 AND W9286 WHICH ENTER AG33 FROM AH33 TO THE WEST, UNTIL THIS AREA IS EXCAVATED, ITS RELATIONSHIP WITH W9839 WILL REMAIN UNCLEAR. W9839, ALONG WITH W9840 AND W9278 MAY BE OF THE SAME CONSTRUCTION PHASE AS W9425. ALL ARE IN ALIGNMENT AND ARE OF SIMILAR CONSTRUCTION. W9839 WAS COVERED BY L9424, BUT NOT SEALED BY IT; 9424 may have robbed upper courses of W9839.

\* W9839 MAY NOT BE CUT BY W9096 - W9096 MAY HAVE BEEN POURED OVER AND HAVE COVERED W9839

**Additional Observations/Value:** W9839 IS PROBABLY A CORNER TO W9278 AND OF PERSIAN CONSTRUCTION AS WELL IT HAS HIGH VALUE.
