Unit	Phase	Stage	Stratum	PoM
------	-------	-------	---------	-----

Summary

Opened: To COMBINE L9862 + L9864 AS THEY HAD SIMILAR MATRICES. AND L9864 CAME DOWN ON W9886.

Limits (N) W9282

(S) UN-NUMBERED PEDESTAL OF W9278.

(E) L9863, L9890 AND L9871.

(W) WEST BULK

Closed: CAME DOWN ON 3 SEPARATE PATCHES OF FLOOR.

Matrix: FILL CONSISTS OF REDDISH BROWN SOIL WITH LIGHT CONCENTRATIONS OF CHARCOAL FLECKS, MUD BRICK DEBRIS, AND POTTERY SHERDS. FLOOR (a) IN THE NE CORNER MEASURES .5M X .5M AND CONSISTED OF THINLY PACKED CRUSHED KURKAR. FLR (b) IN THE S of 9889, IS A THICK FLR OF CRUSHED KURKAR MIXED WITH DARK GREY MUD. IT HAS A RESURFACING PATCH AND MEASURES .5M X .2M. FLR (c) IS A LIGHT PATCH IN THE NW CORNER OF THE SOUTHERN HALF OF 9889, MEASURING .3M X .2M & CONSISTED OF THIN CRUSHED KURKAR.

Relations: [L9889] IS A CONTINUATION OF THE SAME MATRIX AS L9862 AND L9864; [L9897] IS COVERED, BUT NOT SEALED BY L9862 + L9864. [L9889] IS CUT BY PITS L9875, L9871, AND L9862/L9890. TO THE SOUTH, [L9889] CONT INTO THE UN-NUMBERED PEDESTAL OF W9278. TO THE NORTH, [L9889] IS CUT BY W9282, AS A FOUNDATION TRENCH IS VISIBLE (EXPLAINED BELOW). L9932 BELOW IS A CONTINUATION OF FILL [L9889]; [L9889] COVERS, BUT DOES NOT SEAL, THE W. HALF OF L9932.

→ [F9889(a)] IS CUT BY W9282 TO THE NORTH. [F9889(a)] APPROACHES W9282 BUT CLEARLY STOPS WITHIN ≈ 4CM OF IT, INDICATING THAT A FOUNDATION TRENCH CUT THE FLOOR. TO THE E [F9889(a)] IS CUT BY L9871. THE WESTERN + SOUTHERN OUTLINES ARE NON-CONTINUOUS AND PATCHY. ELEVATIONS ARE Hi = 14.38 / Lo = 14.75.

→ [F9889(b)] WAS FOUND WITHIN THE TWILIGHT ZONE BETWEEN [L9889] AND L9871/L9890. IT CONSISTS OF 2 CLEAR RESURFACINGS WHICH SLOPE DOWNWARD, AT A 45° ANGLE. [F9889(b)] PROBABLY CONT BELOW L9871, ALTHOUGH THIS AREA IS AS YET UNEXCAVATED TO THE SW. [F9889(b)] GRADUALLY SLOPES NE TO SW, IN A LINE THAT HAS BEEN NUMBERED F9932(b) WHICH CONNECTS TO [F9889(c)]. THIS SW SECTION RUNS BELOW PIT L9890. ELEVATIONS ARE: Hi 14.81 / Lo 14.61.

→ [F9889(c)] REACHES, BUT DOES NOT GO BELOW, L9875. IT ALSO CONTINUES INTO THE W BULK. AS MENTIONED ABOVE, IT CONNECTS W/ [F9889(b)] VIA [F9932(a)]. IT ALSO APPEARS TO SLOPE DOWN SOUTHWARD, AS WE HAVE FOUND A FLOOR (F9932(c)) EXACTLY SOUTH BUT AT A SLIGHTLY LOWER LEVEL, OF THE SAME MATRIX. F9932(c) CONTINUES (SOUTHWARD) TO F9948. ELEVATIONS = Hi 14.85 / Lo 14.80.

Additional Observations/Value: POTENTIALLY HIGH VALUE; RELATED TO F9932 FLOORS. MATERIAL PROBABLY SOMEWHAT MIXED W/ SUBFLOOR MATERIAL. FILL YIELDS IRON AGE MATERIAL. ADDITIONAL PHOTOS = 101482, 484.

Opened: _____

Limits (N) _____
(S) _____
(E) _____
(W) _____

Closed: _____

Matrix: _____

Relations: Notes: Originally F3948 / F3932 / F3889 probably covered much of the S end. Most likely [L3889], as well as L3948 and L3932, contain material from below their own floors due to the extreme N-S downward slope of F3948 + F3932 + F3889.

Also, F3889(A) is the last of a series of resurfacings. From top to bottom, the floor numbers are F3888(A) > F3932(A) > F3944 > F3962 > un-numbered floor below

Additional Observations/Value: _____
