Summary

Opened: Came down on mudbrick wall in the W and stone wall in the E

Limits (N) [L 9935] and [L 9958]
 (S) [L 9916] [W 9959] [L 9943] and the bank
 (E) Western limit of square A932 and pit [L 9891]
 (W) Bank

Closed: End of season - Not closed

Matrix: To the W mudbricks, to the E head size fieldstones. [L 9916] red brown material with traces of mudbrick [L 9935] red brown material. [L 9958] brown sandy material and small stones. [L 9970] thick mudbrick material [L 9977] brown sandy material with some pottery and stone. [L 9917] head size stones more irregular than [W 9993] *

Relations: [L 9970] covers [W 9993] in the W; [L 9977] covers but does not seal [W 9993] in the E
To the N [L 9943] is reached by the fill material of [L 9935] on the W side
on the E side [W 9993] is reached by the brown sandy material of [L 9958]
To the S, the W part of [W 9993] is reached by the fill material of [L 9910]
The W part is abutted by [W 9959] and reached and perhaps slightly covered by [L 9943]
To the W [W 9993] appears to continue into the bank
To the E [W 9993] appears to be cut by the pit [L 9891] that continues into square A932 [L 9139] + 9475 + 9990

Comment: [L 9993] is probably part of [W 9943] in square A932
 * Matrix cont: (In the W the stone part of [W 9993] seems to be 2-3 courses high. In the E only 1 course is visible in the section of pit L 9891. Excavation of 9916 and 9970 may have removed part of the top surviving course of the mudbrick section of [W 9993]. The W face consists of 3 bricks in header fashion, the S face is 2 stretcher bricks. The wall is 2 bricks wide. It is not yet clear if one section abuts the other, or if they dovetail. The bricks are only 1 course high so far. Brick dimensions are: headers L 0.45, W 0.25, stretchers L 0.42, W 0.30

Additional Photos: 102043 - 102044
 Additional Observations/Value: Mudbrick wall attached to stone wall
